THURR SOLUTIONS PORTFOLIO SAMPLE

AI automation systems for lead intake, follow-up, and owner visibility.

Operating Promise
We build. You profit.

Thurr Solutions builds practical automation systems for local service businesses and small teams. The work focuses on business process diagnosis, n8n workflows, CRM-style records, owner alerts, AI-assisted summaries, and manual approval points where judgment matters.

CORE SERVICES

01

Lead-Flow Diagnostic

Score the current lead path, find the biggest leak, and map the first

02

n8n Intake Automation

Capture new leads, save records, tag status, notify the owner, and create follow-up tasks.

03

AI Buildout Blueprint

Turn a business idea or workflow problem into a practical execution

automation worth building.

roadmap and system plan.

EXAMPLE DIAGNOSTIC

Mobile Detailing Lead-Flow Diagnostic

A sample client diagnostic that reviews offer clarity, quote capture, response speed, proof, and follow-up, then recommends a quote-to-booking system.

68

Opportunity score: enough demand to grow, but the follow-up path needs a real system.

01 **Lead lands on diagnostic or quote page.**

02 **n8n receives the form and validates key fields.**

03 **Supabase or CRM stores the lead record and status.**

04 **Owner gets a privacy-safe alert in Discord, Slack, or email.**

05 **AI drafts a diagnostic or lead summary for manual review.**

06 **Approved follow-up invites the prospect into the next step.**

TOOLS AND STACK

AUTOMATION

n8n, Webhooks, APIs

DATA

Supabase, Sheets, Airtable

AI
